Course Description

This course aims to elucidate data structures and methods of organizing large amount of data. Even though computers become faster and faster, the need for programs that can handle large amounts of input becomes more acute. This requires more careful attention to efficiency, since inefficiencies in programs become most obvious when input sizes are large.

Student Learning Objectives

Students should look at problems and see how implementations can reduce the time constraint for large amounts of data. The goal of the textbook is to teach students good programming and algorithm analysis skills simultaneously so that they can develop such programs with the maximum amount of efficiency.

Teaching methods

This course consists of lectures, discussions, hands-on projects, and student presentations. Students must be prepared to discuss the assigned chapters during class.

Exam Schedule

- Final Exam: June 25 - 29, 2018

Assessment of student performance

- Self-Study and Reading ability Practice

- Instructor will give out the chapters or the reference books to read and use class hours to have discussion, and students should be able to show a proactive attitude and ability for self-study and reading. Knowledge and oral English will be elements of homework or presentation score.

- Homework

- Students should finish their homework (except for group projects) by themselves. Copying from others will be treated as cheating. Students should hand in all assignments promptly and on time. Late assignments will be accepted at the discretion of the instructor (e.g., when the student was ill or had an excused absence). Assignments turned in late without proof of illness or an excused absence will be reduced in score by at least 50%.
- Assignment should be printed out. Anything that cannot be read will be marked wrong. Printing requirements are as followed: single space between lines, double space between paragraphs, font size is 12 (maximum). Grammatical errors can reduce your score up to 20%.

- Attendance

Attendance in class is required for all students taking courses at the Capital University of Economics and Business Overseas Chinese College.

- Being late for 15 minutes or more is considered an unexcused absence.
- Five hours or above of unexcused absences will result in the lowering of the final grade by one grade band (e.g. from C – to D +). Any excused absence must be discussed directly with the teacher.
- 30% of class hours of any kind of absences will result in a failing grade (F), but students are welcome to continue attending the class.
- An incomplete grade (I) will be considered in case of medical or family emergencies.

● **Participation**

- Students should participate in classes actively. Half of the participation grade is determined by their activity in class. They are encouraged to ask questions relevant to the subject and express their own opinions. Every student should respect the ideas, opinions, and questions of their classmates.
- Students are recommended to build study groups, which can be helpful for any group projects and presentations.
- Students should also use office hours to ask questions or talk with the instructor for good communication and effective learning. Any misbehavior and non-class related activities in class will result in the lowering of the participation grade, including ringing **cell phones or other digital devices**.
- All above behaviors will be solely evaluated by the instructor for scoring.
